

School of Biological Sciences

RPG Qualifying Seminar Series (M&CB Area)

Date: 30 April 2026 (Thursday)

Time: 1330

Venue: KBSB 6N-11

Time	Name	Title	Supervisor
1330	Wong Cheuk Lam Matthew	Inducing Plant Immunity by Transient Elevation of NAD Levels	Prof B Lim
1400	Deng Bofu	Molecular Characterization of Flavonoid Biosynthesis and Its Regulatory Networks in Rice	Prof Clive Lo
1430	Guo Yating	Plastid Translation Plays Dual Roles in Retrograde Signaling and Photosystem II Biogenesis	Prof Peng Wang
1500	Fan Ting Hay	Lysozyme inhibitors as bacterial components promoting Parkinson's disease	Prof C G Zheng
1530		BREAK FOR 5 MINUTES	
1535	Ren Min	Effects of gut microbiome-derived metabolites on host health	Prof C G Zheng
1605	Lin Bilian	Knockdown of secretin in dentate gyrus induces spatial memory impairment	Prof B K C Chow
1635	Huang Yunfei	Role of SBK1 in Ubiquitination Regulation	Prof C B Chan
1705	Chen Mengyu	Optogenetics for integrating the role JAK-STAT Signaling	Prof H Johnson
