

1st INTERNATIONAL CONFERENCE ON FOOD SAFETY

16 – 18 June, 2014
HONG KONG

From Experience to Perspectives

About the Conference:

In recent decades, an aging population, changing agricultural practices, globalization of our food supply, among other factors, have created new and emerging food safety threats while traditional concerns persist. As a result, issues in food safety impact the well-being of humans and, importantly, the global economy. The conference will address the emerging issues and the diverse aspects of food safety with special emphasis on global impact.

Scientific Themes:

- Food Safety and Public Health
- Food Safety from farm to table
- New Food Technologies:
Advancing Safe Food Supply
- Fraudulent and counterfeit food
- Novel technologies and applications into food safety
- Global Food Safety:
International Harmonization and Collaboration

Notes:

For Sponsorship information please contact us at icfs@hku.hk
